

REAL PERFORMANCE WITHIN REACH

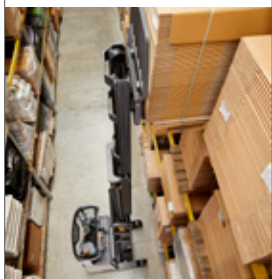

ESR 1200 Series reach trucks enable higher productivity based on application specific truck configuration, faster and smarter truck performance and an operator-focused work space. Adding advanced technology, robust construction and efficient energy solutions delivers reach truck serviceability and reliability required for success.

Discover how the ESR 1200 Series reach truck can boost your throughput:

ESR 1200 Series

Performance

Operators of ESR 1200 Series reach trucks can deliver higher levels of throughput with optional Xpress Lower™, Auto Height Select, Tilt Position Assist, and OnTrac traction control features.

Cold Storage

Cold storage cabin is available to keep operators comfortable even in the most challenging environments.

Technology

The Gena Operating System reminds operators of their training with Safety Reminders and increases serviceability and uptime with an intuitive analyzer menu and step-by-step calibrations.

Stability

Increased mast stability on the ESR 1200 improves residual capacities and reduces mast sway. Three optional mast designs help ensure your reach truck is appropriately configured for your application.

Energy

Lithium-ion and lead acid battery options provide the power you need for outstanding throughput. Regen Lower and eGEN Braking combine to extend runtime.

Choose Crown's ESR 1200 Series for **real performance throughout your operation.**
